

Job Title: Clinical Project Manager

Company: ACE Research - Contract Research Organization (CRO) Location: [Specify Location]

Job Summary: ACE Research, a leading Contract Research Organization (CRO), is seeking an experienced Clinical Project Manager to lead and oversee clinical research projects. The ideal candidate must have a minimum of 10 years of relevant experience in clinical project management. As a Clinical Project Manager at ACE Research, you will play a critical role in planning, executing, and delivering successful clinical trials while ensuring compliance with regulatory standards.

Key Responsibilities:

1. **Project Leadership:** Lead cross-functional project teams, setting clear objectives and timelines for the successful execution of clinical trials.
2. **Project Planning:** Develop comprehensive project plans, including budgets, timelines, resource allocation, and risk assessments.
3. **Stakeholder Management:** Collaborate with sponsors, clients, and internal teams to ensure clear communication and alignment on project goals.
4. **Regulatory Compliance:** Ensure that all clinical trials are conducted in compliance with international regulations, GCP, and local guidelines.
5. **Resource Management:** Allocate and manage project resources efficiently to meet project milestones and deliverables.
6. **Quality Assurance:** Oversee the quality of clinical trial data, ensuring accuracy and completeness.
7. **Risk Management:** Identify potential project risks and develop risk mitigation strategies.
8. **Budget Oversight:** Monitor project budgets and expenditures, making necessary adjustments to stay within budgetary constraints.
9. **Timeline Adherence:** Ensure that clinical trials progress according to planned timelines and milestones.
10. **Documentation:** Maintain accurate and organized trial documentation, including essential documents and project reports.
11. **Issue Resolution:** Address any project-related issues promptly, working with teams to find solutions and ensure project success.

Qualifications:

- Bachelor's or advanced degree in life sciences or a related field.
- A minimum of 10 years of clinical project management experience within the pharmaceutical or CRO industry.
- Strong knowledge of ICH-GCP guidelines and international regulatory requirements.
- Proven track record of successfully managing clinical trials from initiation to closeout.
- Excellent leadership, communication, and interpersonal skills.
- Proficiency in project management software and tools.
- PMP or equivalent project management certification is a plus.

Why ACE Research:

- Join a reputable CRO dedicated to advancing clinical research and improving healthcare outcomes.
- Work with a collaborative and skilled team of professionals.
- Competitive compensation and benefits package.
- Opportunities for career advancement and professional growth.

If you are dedicated and experienced PM looking to take the next step in your career, apply today to be part of our mission to advance healthcare through clinical research at ACE Research.
